

Name	Phill Pearce
Position / Function	National Forum for Acute Surgeons (NFAS) Representative
Date of Report	18 May 26

Activity Summary	NFAS continues as a platform for discussion amongst General Surgical Consultants with an interest in EGS and acute care surgery. Discussion topics on the forum in the last 12 months have included: - the role of AI in development of surgical guidelines - consenting role of SNP/ACP/ANP - use of digital consent platforms - GLP1 – agonists in acute surgical presentations - HVLC operating lists - Acute care surgical presentation numbers and workforce flow - Comparison of M&M structures for EGS - Coroner referral process for SBO - Extended VTE for benign disease - Medicolegal case precedent for appendicitis The forum also allows for the sharing of courses and job opportunities for consultants and fellows Poll of current active members concluded that there was no desire for NFAS to undertake separate meetings (particularly as most are ASGBI members) but that informal social networking would be useful in the future.
