

Name	Nick Evgenikos
Position / Function	East Scotland
Date of Report	21 May 2026

Activity Summary	I have attended few of the Regional Representative Teams meetings and Council meetings (11 November 2025, 4 June 2025, 25 February 2026, 29 April 2026) and attended the ASGBI Brighton meeting which was hugely successful and enjoyable. The main problems in East Scotland is still the effects of the robot in training, distribution of theatre lists and organisation, the creation of some uncomfortable completion between consultants about who gets access first. There have not been problems in recruiting trainees and most of the trainees are of excellent quality. Equality and diversity are encouraged at all levels but how to deal with trainees in trouble varies between deaneries.
Publications / Guidelines	None
Significant Events	Only local M&M, trauma and joint meetings with ITU. The old Lothian Surgical Audit meetings are well buried for many years in spite of their effectiveness in building a collegiate spirit between units.
Meetings Held	None
Key Relationships	The RCS Edinburgh would be a good forum for more networking within general surgery but I have found The Moynihan Chirurgical club a more helpful organisation for getting new ideas. Universities and deaneries and the NES are less useful.
Acknowledgements	The above institutions.
Aims and Objectives for next period	Have discussions with the East Scotland and other active members how to increase visibility of the ASGBI in Scotland.
